President's Message

The Summer seemed to fly by, and fall is finally here! The last year has been full of changes, new opportunities, and growth for everyone. The Chapter continues to persevere and advance through these new times by taking advantage of remote and hybrid meetings to conduct business and engage membership. The award-winning New England Chapter Connects program is a true testament to this.

It has been a pleasure and honor to serve as your President this year and I would like to thank all who have worked behind the scenes to make the Chapter function. Each week seemed to bring on a new challenge, forcing us to pause and pivot in a different direction and I would like to personally thank the Chapter's Executive Committee (Jaqui Connors, Chip Barrett, Steve Mattscheck, John Bechard, Rich Benevento) for all their support throughout the course of the year. In working with you, it is obvious that each of you are dedicated to keeping the membership safe and the Chapter the best it can be.

Even with the challenges we have encountered, the Chapter has had an outstanding year with many individuals, agencies, municipalities, and companies receiving national awards. The Newsletter Committee has done an outstanding job compiling and preparing this issue of the Chapter Chatter so we can all see the hard work and dedication of those honored. Congratulations to all that received awards including members of the New England Chapter, for receiving its 21st

PACE Award (Presidential Award for Chapter Excellence). The Chapter's Award Committee continues to do an outstanding job and I am looking forward to attending the Award's Luncheon Ceremony later in the month.

The Chapter is always looking for new ways to grow our membership and how we can provide additional benefits to our members. The Chapter is exploring ways to better engage with our western New England members with expanded opportunities to foster collaboration and networking. The Chapter's Membership Team is also reaching out to lapsed members, in order to better understand if the services we provided did not meet their expectations or needs. At the same time, we are reaching out to current active members to request information to assist us in making their membership more meaningful and worthwhile.

Once again, we had a great showing at the Snowplow Roadeo in Colorado. I had the pleasure of watching the New England competition in Boxboro back in August. I am grateful for the skill and aptitude that our drivers have (#snowplowdrivers)! Congratulations to all who participated, and to Steve Mattscheck and Tim Ledogar for organizing another successful event.

I couldn't wait to say, "Hello NE Chapter and welcome back to the Cape!" Hard to believe it has been 27 months since we were last at the Red Jacket in Yarmouth. Having Retired Brigadier General, John Lawlor, open the event with the Pledge of Allegiance set the stage for great things to come. The Clambake was delicious and the raffle that followed raised more than \$1700 with all proceeds going to a local organization (Bright Lights) in Yarmouth, something we should all be proud of. Thank you to our sponsors and all who participated for making this possible.

It was a pleasure and an honor to introduce and welcome Mary Joyce Ivers, National APWA Past President to the Chapter. Her remarks were very inspiring and great moments were shared when she presented awards to Brutus Cantoreggi (Top 10), Frank Marinaccio (Young Leader) and Rick Stinson (Presidential Leadership Award). We are very appreciative to her for making the trip from California!

The highlight of the event came Tuesday evening at the Member of the Year Banquet when we celebrated with our 2021 Member of the Year Lisa Schaeffler Deputy DPW Director from Williston, Vermont. This was a well-deserved honor for a dedicated and hardworking member of our Chapter! Lisa spoke from the heart after receiving her award and I will always remember her remarks, in particular her closing statement - "Public Works is about helping people."

Kudos to the Fall Conference Committee including co-chairs Dan Nason and Christine King for all of your hard work over the past two years, adapting to challenges along the way and making it an event we will always remember! The overall event was a big success and brought many opportunities for us to network during the events and in between education sessions.

One thing is for sure, we have a great organization and membership base that allows us to continue to move forward and make it happen!

Wishing you all good health and happiness!

Anthony J. Garro

2021 APWA National Awards Another Great Year for the New England Chapter

By Rich Benevento, New England Chapter
Awards Committee Chairman

APWA's National Awards Program recognizes outstanding individuals, groups and Chapters representing the best in the public works profession. Hundreds of submissions from throughout the United States and Canada are evaluated in over 25 categories. And the competition is very tough. Each year the APWA National Awards Review Committees receives hundreds of nominations, 2021 was no exception.

The New England Chapter has a tradition of being recognized for our public works achievements. The 2021 APWA National Awards Program proved to be another very successful year for the New England Chapter. This year the Chapter nominated 19 worthy award candidates that resulted in earning another nine National Awards.

The New England Chapter has consistently received National

recognition for the achievements of our members and the public works profession. Collectively the New England Chapter has earned a record 80 national awards within the last seven years: one the most of any of APWA's 63 Chapters throughout the United States and Canada.

As part of an ongoing New England Chapter tradition the Chapter recognizes our National and Chapter Award winners at our National Public Works Week luncheon and at the New England Chapter Summer Conference Awards Banquet. Due to COVID restrictions the Chapter has had to postpone our award ceremonies in 2020 and 2021. Fortunately, with the help of the Awards Committee and the Public Works Awareness Committee the Chapter will be hosting an Awards Celebration with award presentations for our 2020 and 2021 National and Chapter Award winners. The event will

be a great opportunity to give our public works community in New England an opportunity to congratulate the winners on their accomplishments and their well-deserved honor. More information about the awards celebration will be forthcoming on the Chapter website and through emails. In the meantime, we hope that you will also congratulate the award winners in your own special way. They certainly deserve our admiration on their accomplishments.

John Lawlor Bridge Dedication

Press Release

On September 17, 2021, Bridge No. 01076 in Waterbury, CT was dedicated to Brigadier General John P. Lawlor, Jr. in honor of his 34 years of military service.

BG Lawlor, a member of New England APWA who currently holds a position on the Board of Directors, was commissioned as a Second Lieutenant of Infantry in 1987. His assignments include participating in a task force in Sarajevo Bosnia-Herzegovina, as well as serving as Public Works Team Chief during Operation Iraqi Freedom. BG Lawlor is a proud member of the Military Order of Cincinnatus Society and recipient of the Winfield Scott Medal in recognition of his significant

contributions to the profession of arms and the advancement of the Civil Affairs Branch.

His awards and decorations include the Legion of Merit with two oak-leaf clusters, Bronze Star Medal, Defense Meritorious Service Medal, Meritorious Service Medal with oak-leaf cluster, Army Commendation Medal with three oak-leaf clusters, Joint Service Achievement Medal, Army Achievement Medal with three oak-leaf clusters, National Defense Service Medal with service star, Armed Forces Expeditionary Medal, Global War on Terrorism Expeditionary Medal, Overseas Service Ribbon, NATO Service Medal, Joint Meritorious Unit Award, Meritorious Unit Award, Army Superior Unit Award, Combat Action Badge, Expert Infantryman Badge, Ranger Tab, Master Parachutist Badge and Air Assault Badge.

The Bridge, which carries Interstate 84 eastbound over Route 70 in Waterbury, will now be known as Brigadier General John P. Lawlor, Jr. Bridge. Carlo Leone, special adviser to the

commissioner of the Connecticut Department of Transportation, invited Lawlor to unveil the metal sign bearing his name that will be affixed to the bridge.

“It’s very unusual to have an award or a naming of a bridge or roadway for a living person,” Leone said. “Always in the past, it has been as a memorial to someone who has passed away and their past achievements.”

Lawlor, who was raised in Waterbury and now lives in Southington with his wife, Natalie, is a rarity in another way. He’s among the less than one-tenth of 1% of enlisted men who rise to the rank of Brigadier General.

“While it has never been my goal to be recognized in this way, it has always been my goal to serve others, especially those closest to me,” Lawlor said. “It is my family, my friends, my co-workers and my community that have provided me the support and inspiration over the years in order that I could reach such a pinnacle.”

New England Chapter Connects

From APWA Reporter

It was an undertaking conceived out of necessity. As the COVID-19 pandemic first became a reality in North America last spring, it quickly became apparent that things were going to change for the 63 chapters in APWA.

It was obvious that chapters were not going to be able to offer the traditional educational and training opportunities. In-person meetings were curtailed and that would certainly have an impact on engagement.

What was a chapter to do? How could a chapter stay in touch with its members and make sure the membership at least had the same level of value?

Many chapters embraced the virtual (video) meetings. Some offered educational opportunities through a conference, and others promoted the online resources available through the APWA website. The New England Chapter got busy. Through its Public Works Awareness Committee, which works to promote the value and importance of public works in communities, the chapter developed the New England Chapter Connects Virtual Learning Series.

The goal of the program was developed to keep the members of the chapter engaged, informed, and most important during these uncertain times—connected. The first session was held in May 2020.

Working with the University of Connecticut T2 Center and the chapter's Education Committee, the New England Chapter Connects program has provided valuable and interesting topics from a variety of distinguished speakers and panel groups. The collaboration with the New England Chapter and the T2 Center at UCONN was very important to the overall success of the program. The program is held at the same time

every month (4th Thursday at 11 a.m.) and lasts only one hour.

“That was important”, said Rich Benevento, the chair of the Public Works Awareness Committee for the New England Chapter. “Our members can look at that and devote one hour a month and get some valuable information on a variety of topics and from speakers they might not normally have access to.”

This also provided an opportunity to include members from areas of the chapter that normally would drive into the Boston area to attend chapter events or a monthly education meeting.

-Screenshot of the virtual participants.

“We also had members from other chapters, and from as far away as California, Colorado, Michigan and even Puerto Rico,” Benevento said.

The program offered a great opportunity for public works professionals to learn, collaborate and exchange ideas. The sessions are free and open to anyone. The program has become a very popular monthly event for the New England members and the participant registrations continue to increase each month. It has provided an opportunity for members to hear from panelists and subject matter experts.

The January 2021 session, ‘Selling Your Department’s Budget to Elected Officials and the Public,’ had more than 140 registered. Panelists included the Mayor of Montpelier, VT, a

Finance Director from Connecticut, and a Public Works Director from New Hampshire and Rhode Island talking about how to “sell” the public works department’s budget and the discussion was moderated by a Board of Education Finance Director. The panel provided a diverse approach with new ideas for the listeners.

There were experts to talk to those in attendance on hurricane preparedness. Another was on marketing the public works department, to citizens, to elected officials AND to the other members in the department.

“We had panelists who could bring new information,” Benevento said.

Some of the sessions were subject-matter specific, such as “Managing Winter Operations during COVID-19” where the Directors of Operations and Maintenance from all of the chapter’s State DOTs spoke, and the March event: “Planning for National Public Works Week and Beyond.”

“A lot of our members never have had the opportunity to hear from these types of experts,” Benevento added.

Other APWA chapters could offer the same type of information to their members.

Benevento lauded the work of the chapter’s Public Works Awareness (PWAC), Education Committee and the Connecticut T2 Center, that made this idea into a real event in a very short time.

Will this continue?

“New England Connects will endure post-COVID,” Benevento said. “It has become a placeholder on our members’ calendars. We think it may have an ongoing presence in the PWAC outreach toolkit beyond the pandemic.”

Muddy Brook Culvert Replacement

By Lisa Schaeffler, Williston, VT DPW

The City of South Burlington, in cooperation with the Town of Williston VT, constructed a new arch culvert that will span the Muddy Brook that bisects the City of South Burlington and the Town of Williston. The new arch culvert will replace the 150-ft temporary Maybe bridge that was installed after the existing metal

culvert was damaged in a 2017 storm, and further damaged in the Halloween storm of 2019. The new arch culvert will be 70-ft long. The new road will be 30-ft wide from curb to curb, and there will also be a new 10-ft wide shared use path connecting the City and the Town of Williston. New drainage and miscellaneous utility upgrades are also included as part of the project.

APWA Presidential Leadership Award

By Christine King, BETA Group

We are pleased to announce that New England Chapter member and former Chapter President (2001), Rick Stinson, has been awarded the prestigious APWA Presidential Leadership Award. This award is selected by the National President and has only been awarded to 21 recipients since 1997.

Each year the Presidential Leadership Award may be bestowed at the sole discretion of the APWA President.

This year, President Mary Joyce Ivers recognized Rick as a member who has distinguished himself with his leadership in the community and within the public works profession.

An Associate with BETA Group, Inc., Rick has an extensive background in the public sector, including 18 years as the Director of Public Works in Wakefield, MA. Rick has been an active member of New England APWA since

1988, having held the roles of National Region 1 Director, Chapter President, and National Delegate, as well as participating on several committees.

President Ivers noted that it was an honor to present the 2021 Presidential Leadership Award to Rick, who has distinguished himself and the public works profession with his leadership and dedication to APWA and Public Works. Rick has been a champion for Young Professionals, APWA's Fallen Heroes program, and the First Responder initiative.

“Rick developed many programs and initiatives within the New England Chapter and is a champion for the motto ‘Public Works Makes It Happen’. Rick is a friend, and is highly respected throughout the public works community, nationally and internationally,” she said. “He always exhibits his leadership qualities and devotion to the growth of the public works profession.”

Please join us in congratulating Rick!

National SnowPlow Roadeo Loveland, Colorado

By Tim Ledogar, C.N. Wood

Pictured left to right: *Timothy Ledogar* C.N. Wood, *Joel Kosegarten* Portsmouth, RI, *Joe Sullivan* East Providence, RI, *Laurie Massconi/Matt Krupsky* Oxford, MA, Chapter Vice President *Steve Mattscheck*, *Shawn Fallon* East Providence, RI, *Neal Belliveau* Portsmouth, RI.

The APWA National SnowPlow Roadeo was held during the Western Snow and Ice Conference September 28th - October 1st, in Loveland, Colorado.

Representing the N.E. Chapter and competing were the 2019 and the 2021 New England SnowPlow Roadeo Champions from Oxford, MA and East Providence, RI. Teams representing Rhode Island Public Works and Mass Highway Association were also participating at the event.

Joe Sullivan and Shawn Fallon from East Providence RI, Laurie Massconi and Matt Krupsky from Oxford, MA are pictured with Mary Joyce Ivers,

APWA National Past President at the starting line.

Our teams competed in the Single and Tandem Axle SnowPlow Event consisting of a SnowPlow Slalom Course, Pre-Trip Safety / Diagnostics and written D.O.T testing against Chapter Teams from around the Country.

Congratulations to the team of Matt Krupsky and Laurie Massconi for a 2nd Place Finish in the Tandem Axle SnowPlow Event.

Laurie and Matt's 2nd Place finish is the Chapters best finish to date, as well as the National Snowplow Roadeo top placing Female.

We would all like to thank you for the continued support and allowing us to represent the New England Chapter at the National SnowPlow Roadeo.

Beta Welcomes Three New Employees

Emily Slotnick, CFM, AICP has joined BETA as Climate Resilience Manager. Emily has integrated climate impact projections into clients' plans, and takes great pride in leading communities through the process of planning for climate resilience. She helps communities navigate climate adaptation planning and resilience building, developing solutions to reduce vulnerabilities to current and projected impacts of climate change.

Additionally, John Byatt, PE joined the team as Vice President and Manager of our Manchester, NH office. Throughout his career, John has worked closely with municipalities and state agencies including NHDOT, VTrans, and MaineDOT. We are thrilled to have John leading the growth and expansion of BETA's Manchester's Office and servicing clients in northern New England.

We are also thrilled to welcome Rick Stinson, PWLF. Rick has significant experience as a municipal employee, including his 18-year tenure as Director of Public Works in Wakefield, MA and his time as Interim Director in Melrose, MA. Rick is an active member of NEAPWA, having held the roles of National Region 1 Director, Chapter President, and National Delegate, as well as participating on several committees. As an Associate with BETA, he will focus on business and client relations, using his expertise to offer guidance on projects from funding through construction.

FAMCO & Tricor Team up

Felix A. Marino Co., Inc. (FAMCO) is pleased to announce that we have been assigned exclusive distribution rights of Tricor Refining, LLC (Tricor) products for the New England region. Tricor, (formerly known as “Golden Bear”), is a producer and distributor of specialized asphalt rejuvenating and recycling oils and emulsions for applications such as restorative and preservative penetrating seals, cold crack filling, and dust retardants. FAMCO and Tricor have enjoyed a strong, long term relationship through the development and application of specialized asphalt preservation technologies going back to the 1970’s. FAMCO is pleased to continue to serve our customers and future clients throughout New England with industry leading, time tested, proven pavement preservation products and services.

famco.us

GOLD SPONSORS

Indus Welcomes Todd Connors

We’re excited to announce that Todd D. Connors, P.E. has joined the indus team as our newest Regional Manager servicing New Hampshire, Maine, and northeastern Massachusetts. Todd comes to indus from the City of Manchester, NH where he and his teammates implemented and oversaw an outstanding pavement management program. Before that, Todd owned his own engineering consulting business and worked for other regional engineering firms. Todd has a passion for pavement preservation and recycling, experience with treatments at every stage of the asphalt deterioration curve, and a wealth of knowledge built during his 25+ year career in municipal

public works and engineering services. Todd now enjoys sharing his pavement management expertise with municipal leaders across northeastern New England and helping them stretch their taxpayer dollars. Please join us in welcoming Todd to the indus family.

“Coming up with an asset management approach is vital when dealing with limited road budgets. Once we started using a full toolbox of treatments in Manchester, our program really started to thrive. Now I’m having fun partnering with lots of different communities, sharing what we learned in Manchester, and helping them improve their roadway networks.”

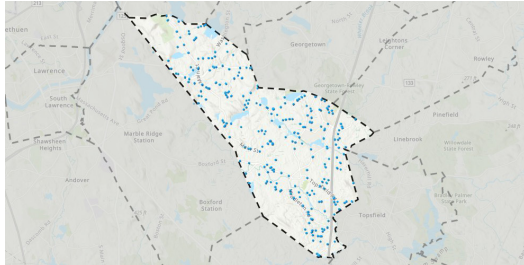

indusinc.com

Managing Town-wide Bridge & Culvert Infrastructure

TEC and the Town of Boxford DPW recently formed a partnership to address town-wide bridge and culvert infrastructure. When Chris Olbrot, PE became the new DPW Superintendent and Town Engineer in July of 2019; he made managing his infrastructure assets a top priority. He knew from the massive, 20-year old 3-ring binders of previous field reports that he had well over 200 bridge and culverts throughout his rural community. TEC’s structural engineers assisted DPW by putting boots on the ground to locate, inspect and assess 231 culverts and 6 bridges over a 2 month period. The inventory was GIS mapped, data tabulated and an asset management plan was put in place. The plan identified seven (7) culverts requiring immediate action, one of which failed in the summer of 2021. Using the asset management plan, the DPW was ready to respond with a temporary action plan with minimal inconvenience to the public and a permanent solution at this culvert location. Boxford’s DPW and TEC continue to progress a capital improvement plan that will address Boxford’s road, bridge and culvert infrastructure assets over the next 5 to 10 year period.

theengineeringcorp.com

Della Donahue Featured in Boston Architectural College Alumni Profile

Della Donahue, an architect with Weston & Sampson, was recently featured in an alumni profile from the Boston Architectural College, where she completed her Master of Design Studies in Sustainable Design in May of this year.

In the profile, Della credits her childhood awareness of our consumption and waste as humans for inspiring her to write her thesis on “The Department of Public Works and its Unique Leverage to Steward Municipal Sustainability.” She now uses her twin passions for design and the environment to make municipal DPW facilities more resilient and sustainable.

Operationally, she illustrates how municipalities do not have to recreate the wheel for stewarding sustainability – every city and town has a Department of Public Works and each one has an inherent connection to environmentalism and the capability to model the way. As for public works facilities, many buildings and yards are due for updates and modernization. Della’s thesis proposed a model green DPW facility that takes into consideration dozens of sustainable initiatives, allowing the client to select from a menu of design choices for their new facility.

Della goes on to examine the disconnect between human activity, the impacts that activity has on the environment, and the unique role that DPWs play.

Bringing Back an Ecosystem

Tighe & Bond and the Portsmouth Water and Fire District addressed Portsmouth, Rhode Island's aging Union Street Pumping Station. The pumping station is the main source of water for the water system and the deteriorating infrastructure increased difficulty with maintenance and meeting future consumer demands. The new pumping station was built on adjacent land to tie into the existing pipe infrastructure and has vertically mounted pumps for a smaller footprint while increasing capacity to 3.5 MGD. The engineers designed a cross between a bright red barn and a farmhouse to ensure the pumping station also blended into the coastal community.
